Currently learning: React and Next.js -
applying them in personal projects.

LANGUAGES

Czech

Native (C2)

English

Upper-intermediate (B2)

EDUCATION

Bc. (Bachelor's degree), Geography and Regional Development

University of Ostrava · Ostrava
2007 - 2010

INTERESTS

I enjoy learning and exploring new topics - I
listen to podcasts, read technical and popular
science books, and take courses that interest
me.

I also enjoy meet-ups, conferences and
community events, where I can discover new
ideas and meet interesting people.

Away from the screen, I like making things by
hand - sewing, making jewellery and creating
home accessories. Creative work is also a way
for me to unwind and recharge.

PROFILE

Creative front-end developer specializing in Vue and Nuxt, with more than
three years of experience. My background in administration, accounting and
HR helps me connect the technical and business perspectives and think in a
broader context.

Alongside Vue and Nuxt I am currently working with React and Next.js in my
own projects. I actively bring AI into my development workflow - I use
Claude Code and other tools for prototyping, navigating the codebase,
refactoring, debugging and code review.

WORK EXPERIENCE

Frontend Developer (Vue, Nuxt)

Localazy · Brno, Czech Republic (remote) · June 2025 - July 2026

- Designed, built and prototyped experimental projects - landing pages and
microsites - with a focus on responsiveness, performance, page speed and SEO.
- Worked with Directus as a headless CMS - created and managed collections and
implemented efficient data fetching through the official Directus SDK, with type
safety.
- Collaborated across teams - with product and marketing - turning briefs into
working pages in short iterations.
- Maintained and extended reusable components so further experiments could be
built faster and more consistently.

Vue Nuxt Tailwind CSS TypeScript Directus Directus SDK Playwright Figma
Claude Code

Frontend Developer (Vue, Nuxt)

Develit.io · Prague, Czech Republic (hybrid) · February 2025 - April 2025

- Contributed to the development of web applications, focusing on UI
implementation, responsive design and SEO.
- Created interactive prototypes and helped establish the foundation of a design
system.

Vue 3 Nuxt 3 Tailwind CSS UnoCSS PrimeVue Figma Tokens Studio Figma Variables

Frontend Developer (Vue, Nuxt)

NAVISYS s.r.o. · Brno, Czech Republic (on-site) · January 2025 - February 2025

- Completed intensive onboarding focused on SaaS application development.
- Worked with the project architecture, testing practices and the established
development workflow.

Vue 3 Nuxt Tailwind CSS Cypress

Junior Front-end Developer

NejŘemeslníci.cz · Prague, Czech Republic (hybrid) · June 2021 - July 2024

- Developed a web application with a server-rendered, component-based interface.
- Implemented designs from Figma into a responsive interface and built reusable
components.
- Managed feature flags, supported continuous deployment and collaborated
through pull requests and code review.
